65th Year, Number 23 | Truckee, Nevada County, California, Thursday, August 2, 1933 | Established 1869

DEDICATION TAHOE RIM LAKE DRIVE NEXT SUNDAY

Program in Natural Amphitheatre At Panoramic Point

Completion Of The New Modern Highway Around Lake Tahoe Offers Motorists Some Of The Most Gorgeous Scenery In The United States. United States Bureau Of Public Roads Proud Of This New Achievement

At 11:00 A. M. on August 6, one of the West's most scenic highways, the Tahoe Rim of the Lake drive, will be dedicated with appropriate ceremonies.

The affair, which will be interstate in character and sponsored by the Lake Tahoe Sierra Association, with the co-operation of the United States Bureau of Public Roads, will be staged in a natural amphitheatre at Panoramic Point, which is located mid-way between Brockway and Glenbrook on the Eastern side of Lake Tahoe.

For some little time motorists have been able to traverse the Western, or California side of the lake in comfort, and it was but three or four years ago that the first round the-lake motor trip became possible, with the opening of the "missing link" between Brockway and the Clear Creek highway summit above Glenbrook. This latter stretch of road has been in very poor condition. It was steep, narrow and had many sharp turns. It was used mainly by experienced mountain drivers.

For the past several months the United States Bureau of Public Roads has been engaged in modernizing this stretch of about twenty miles. With the completion of exisiting contracts during July, motorists will have available a modern highway encircling the lake—a road with one hundred miles of unsurpassed views.

The Tahoe Rim of the Lake Drive will be a modern, safe, high speed, high gear road, hard surfaced for the entire distance around the lake, with the exception of the newly completed link. While hard surfacing and oiling preparations on the latter section is scheduled for next spring, motorists taking the new scenic circuit of the lake after the first of August will have no inconvenience.

On the Nevada side of the lake Californians will find many points of interest, the new tunnel through Cave Rock, Teakettle Dome, Panoramic Point, the Y tree, Zephyr Cove with its sandy bathing beach, and the side trips over the Clear Creek and Mt. Rose scenic highways to the "Biggest Little City in the World." On the Western rim near Tahoe Tavern, the Governors' Grove was dedicated with appropriate ceremonies, by twenty-five or thirty visiting Governors on Sunday morning, July 23. Trees in this grove which fringe the lake front, were named after each of the delegates to the 1933 Governors' Convention.

In Tahoe Rim of the Lake Drive with its 100 miles of unsurpassed views, exists a scenic motor trip unrivaled by any highway of comparable length in the world.

SIERRA REGION NEWS FLASHES

MARKLEEVILLE BARBECUE ON AUGUST 27

Special to the Sierra Sun

MARKLEEVILLE, Cal., August 3—Plans are complete for the Annual Barbecue to be held here on August 27. A crowd of 3000 persons is expected and being planned for.

Governor James Rolph and a host of notables from all over California will attend this barbecue.

BIG TROUT CAUGHT NEAR GLEN ALPINE

Special to the Sierra Sun

GLEN ALPINE, Lake Tahoe—A sixteen-inch Lochleven in a catch from Grass Lake—a basketful of Eastern brook, Rainbow and Lochleven from Lake Aloha in Desolation Valley—nine nice ones in two hours from Glen Alpine Stream; these are indicative of the past week's fishing reports from the thirty lakes and streams within six miles from Glen Alpine.

RATTLESNAKE CONTEST AT NORDEN

Special to the Sierra Sun

NORDEN, Cal., August 3—A new rivalry has been started by Norden enthusiasts recently when Clarence E. Hart spent last Friday visiting with Slim Shane and Bud Bennett on Red Mountain where the two are located as watchmen. On descending the grade to Cisco, Hart came face to face with a seven button rattlesnake which he brought to Norden for exhibitiin and the following day, not to be outdone, W. G. Flickinger, while exploring a lake in the hills back of Cisco, where he spent the day on a fishing trip, came upon a nine button rattler which he promptly killed and brought to Norden for display. Who will be the next to pass this record? It is a rare sight to find a rattlesnake at this altitude.

RARE IRON COIN FOUND IN MONTE CRISTO

NEVEDA CITY, Aug. 3—R. E. Malaby, gold prospector working a claim in Monte Cristo district near Downieville, last week brought to Nevada City an iron coin he found while at work that he believes to be nearly 150 years old.

Although badly rusted, the coin bears the American eagle and the motto E Pluribus Unum on one side. The other side is worn smooth.

Malaby claims that the United States treasury, under Alexander Hamilton, issued a number of iron coins similar to the one he found. These were plated or overlaid with silver.

He believes his find worth more than its weight in gold.

ALPINE SULPHUR MINE PLANS HEAVY SHIPMENTS

MARKLEEVILLE, Aug. 3—New and powerful equipment was placed in commission last week at the Leviathan Sulphur Mine, preparatory to heavy shipments of the mineral to California markets. The crude sulphur is to be refined by a steam process before being shipped from the property.

80,000 FISH FOR TRUCKEE REGION

TRUCKEE, Aug. 3—The Truckee chamber of commerce has just received advice from the Mt. Shasta Fish Hatchery that they will make a shipment of the following fish on next Wednesday.

For Prosser Creek, 10,000 lochleven trout and 10,000 rainbow.

For Little Truckee, 20,000 rainbow.

For Donner Creek, 20,000 lochleven

For Martis Creek, 10,000 lochleven and 10,000 rainbow.

The fish will be placed in the streams by members of the local chamber.

HUGH McCOLL NEW CHEF DE GARE OF NEW 40 & 8

At a meeting of the newly organized 40 & 8, an honor society of the American Legion, Hugh McColl was elected the Chef de Gare. Chas. Winslow was made Mon. Correspondente, John Patton is Mon Commissare Attendants, Frank Holt Mon Conductore and James McIver Jr the Guarde La Porte.

Don't forget the Eagle's Picnic at Donner Lake next Sunday.

C. EDMUNDS

NRA UNIT IS ORGANIZED IN TRUCKEE REGION

C. Edmunds, Chairman, Stanley Bavier, Secretary and C. B. White, A. P. Leitch, Wm. Englehart, E. L. Loynd and A. Fontana As Special Aides

Truckee was quick to answer to the Nation's emergency call, and at a special meeting of the directors of the Truckee chamber of commerce, the following President's Emergency Reemployment Campaign Committee was selected:

C. Edmunds, General in charge of the campaign; Stanley Bavier, secretary, Colonel in charge of publicity and educational campaign; A. P. Leitch, Colonel in charge of "man power"; Wm. Englehart, Colonel in charge of Speakers' Bureau.

C. B. White, A. Fontana, E. L. Loynd, C. E. Smith were elected Majors to act as special aides.

The committee has been organized along military lines under specific instructions from General Hugh S. Johnson, Administrator of the National Recovery Administration in Washington.

President Roosevelt's NRA band wagon will start rolling in the Truckee region at once. Every merchant and business man is fast climbing on board. Their fares are signed certificates of compliance, showing they have forwarded to the department of commerce in San Francisco signed agreements with the President, agreeing to cut the number of working hours and hire additional workers.

The blue eagles of the NRA are appearing all over the region in the merchants and business establishments. As fast as they sign up the employers' certificate they receive a poster for their window showing that they are in full accord with President Roosevelt in his recovery program.

Consumers also have an equal opportunity to show their allegiance to the President by signing up the Consumers Pledge and posting the consumers sticker, agreeing to only patronize business establishments who have signed up with the NRA

Consumers are urged to only patronize those places of business which display the blue eagle insignia.

The main purpose of the NRA is to fix the hours of labor, to provide more jobs, and to maintain the present wage scale. Every employer is warned that they must co-operate with the NRA wholeheartedly, and that there is a penalty for non-cooperation which brings a fine of $500 per day for the first violation and for a second violation, arrest and prosecution with a maximum of five years in federal prison. Merchants are warned that the day of selling products at half price is past, because the NRA act fixes the selling prices to original cost plus freight, plus five per cent pro

(Continued on Page 8)

ANNOUNCEMENT

With this issue we change the name of this publication to the ——"SIERRA SUN and TRUCKEE REPUBLICAN."

When this paper was established back in 1869, its field was confined to the immediate Truckee area, and it has played an important part in the affairs of Truckee.

The paper, however, has grown to the extent that it now covers over 500 miles of the Sierra region, and in view of its extensive coverage, a change in the name has been deemed most necessary.

From now on, this publication intends to play a very important part in the development of the vast Sierra region, and we pledge our wholehearted support to any movement whereby the people of the Sierra region may be benefitted. To this end, that no just cause shall lack a champion, we dedicate the SIERRA SUN and TRUCKEE REPUBLICAN.

And may we state, that letters with suggestions from our readers are always welcome at all times.

(signed) STANLEY BAVIER

San Francisco-Truckee Airline Is Inaugurated

The new week end schedule passenger plane service between San Francisco-Oakland over the air mail route to Truckee, with a limousine to meet passengers for Lake Tahoe was inaugurated last Saturday.

The super-speed plane, with Franklin Rose at the controls, arrived at the Truckee Flying Field at 11:45 A. M. and the two guests—Mrs. Walter Varney and Mrs. Franklin Rose, were greeted by Mr. Walter Varney and a Welcome Committee from the Truckee chamber of commerce consisting of A. P. Leitch, Tim O'Hanrahan, C. Edmunds and William Englehart. Professor Wedell of San Jose, who has been spending a vacation in Truckee, was also on hand to welcome the guests

The week end schedule goes into effect on August 5th, leaving San Francisco at 11:20 A. .M and arriving at Truckee at 12:20 P. M., just fifty minutes for the trip.

The new service should prove a big thing for the Truckee-Tahoe-Sierra Region, as it will offer an unusual opportunity for busy executives to spend week ends in the region with a minimum loss of time.

N. R. A. PLEDGE CARDS QUICKLY SIGNED UP

The N.R.A. pledge cards received by Postmaster Mary Rutherford last Saturday were all signed up within a short time after they were received. Mrs. Rutherford immediately contacted the Truckee business men and they were quick to rally to the opportunity.

The cards read:

Consumers Statement of Cooperation: I will cooperate in re-employment by supporting and patronizing employers and workers who are members of the N.R.A.

Signed .....

LEGION MOONLIGHT BOAT RIDE TO BE HELD ON AUGUST 5

According to the latest reports, tickets are selling fast for the Truckee Post, American Legion second annual moonlight boat ride to be held on Lake Tahoe on Saturday evening, August 5th.

Do not fail to take advantage of this opportunity to enjoy a moonlight sail around Lake Tahoe at a most unusual low price.

A Hawaiian orchestra will furnish music for dancing.

Supervisor Robertson Guest Speaker Truckee Post American Legion

Supervisor Alex Robertson was the guest speaker at the Truckee Post, American Legion, held on Tuesday evening. The supervisor spoke on the construction of a Veterans Memorial Building in Truckee and the procedure for obtaining same.

The Post was unanimous in giving the supervisor a vote of thanks for the interest he has shown in the project.

The Post voted to hold a moonlight boat ride on Lake Tahoe on August 5th.

Tickets for the moonlight boat ride on Lake Tahoe next Saturday evening under the auspices of the Truckee Post American Legion, may be obtained from any legionnaire.

CHAMBER OUT TO MARK THE OLD EMIGRANT TRAIL

Charles B. White, president of the Truckee chamber of commerce has sent a letter to Supervisor Bigelow of the Tahoe National Forest, urging him to have the C. C. C. boys clears up the old Emigrant Trail passing thru this region, and thus making it possible for one to ride horseback over the old trail. The chamber is also requesting the forestry department to put up enamel signs along the trail.

Professor Wedell of San Jose who has rendered remarkably fine work to this region in staking out the old original Emigrant Trail during the past number of years, has offered to co-operate with the forestry department and the C. C. C. boys in every possible way.

The chamber of commerce feels that with the trail properly cleared and cleaned up, it will be the means of attracting many tourists to the district.

K OF P HOLD ANNUAL PICNIC AT DONNER LAKE

Knights of Pythia from Truckee Reno, Sparks, Colfax, Grass Valley and Nevada City gathered at Donner Lake last Sunday for an annual picnic.

Various water and land athletic contests were held during the day

In the afternoon dancing was held at the pavilion.

In the baseball game, the combined team of members of the Truckee and Reno Lodges, beat the Fallon team.

SHELL OIL COMPANY CONTRIBUTES TO THE FRONTIER DAY FUND

Since the last week's issue of this paper, a check for $10.00 has been received from the Shell Oil Company as their contribution towards defraying the cost of putting on the National Governors' Day and Frontier Day celebration.

EDITORIAL

San Francisco Naval Base

The Sierra Sun is emphatically in favor of establishing a naval base at San Francisco.

What benefits one part of Northern California benefits all sections of California, and this publication is ever on the alert to see that anything which may be of benefit to the Sierra Region is attained.

San Francisco is one of the outstanding shipping centers of the world. With its close proximity to Hawaii and the Philippine Islands, it is the logical port to establish a naval fleet headquarters.

A great city like San Francisco is entitled to a naval base, and this publication is proud to go on record as favoring such a move.

TRUCKEE N.R.A. OPENS BUREAU FOR UNEMPLOYED

The Truckee Committee of the President's Emergency Reemployment Administration has opened up an office in the Public Utility office for the enrollment of every unemployed man in the Truckee Region.

Those who are unemployed are urged to enroll at once and set forth their qualifications.

The committee will also contact every employer in the region with a view of having them consult the new bureau whenever they are in need of help, so that those who are unemployed and registered, may be given an opportunity to support their family.

Everyone in the community who has work of any kind to be done, whether it is but an hours work or a day or a week, is urged to cooperate with the new Truckee NRA bureau, so that effective results may be obtained for those who are in need of employment.

It is absolutely essential that Truckee enter the new war for national recovery wholeheartedly, and do its bit to restore national prosperity.

SIERRA NEVADA LIONS COUNCIL TO MEET TWO DAYS

Sierra-Nevada Council of four eastern California Lions clubs and six western Nevada Lions clubs will hold an annual meeting at Greenville, Indian Valley, Plumas County August 5 and 6.

The outstanding event on the elaborate program will be the banquet to be given in honor of Walter F. Dexter, new district governor and president of Whittier college.

Ira B. Langdon, out-going district governor, will speak on "A College Graduate." The new district governor, Walter F. Dexter, will preside at the "laying of the cornerstone" of the Sierra Nevada Council of Lions Clubs, which will be one year old this August.

CARD OF THANKS

I wish to thank everyone for the support given me in the Frontier Queen Contest.

IDA COSTA

EAGLES PICNIC AT DONNER LAKE ON SUNDAY, AUGUST 6

Elaborate plans have been made for the Eagles Picnic to be held at Donner Lake on next Sunday, August 6th.

An interesting program of various sports has been arranged by Truckee Aerie No. 1124, Fraternal Order of Eagles.

There will be dancing in both the afternoon and evening.

Bring your own lunch or you can be accommodated at the Donner Lake Hotel or Coffee Shop, located across the road from the picnic grounds.

TRUTH - JUSTICE — STANLEY BAVIER, Editor

Dedicated to the Service of the People of the Sierra Region that No Just Cause Shall Lack a Champion

A WORTHWHILE LESSON

During the course of Hillard Welch's short but inspiring talk made at the Donner Memorial before the visiting Governors, he brought out the fact that the Donner Party tragedy was mainly brought about by lack of faith and confidence in the leaders in charge. And that their pitiful plight could have been prevented by wholehearted co-operation. History is of little value unless we can analyze it and apply to our own problems some wholesome truth to be gleaned from the past experiences of the human race.

Nature has endowed us with the most beautiful scenic empire in all the world. Nowhere, world renown travelers tell us, is there any place which equals the Sierra mountains for exquisite beauty and grandeur. Nowhere—advise those who make the entire world their home—is there another spot with such delightful, bracing and invigorating climate.

With Nature showing us so much favor, there is no consistent reason why the Sierra Region should not take its rightful place as the leading playground resort of the world.

What is required to bring about the proper development of the Serra Region, in order that everyone may have the opportunity to enjoy what we have to offer? The answer is merely what it takes to make any undertaking a success; wholehearted co-operation, trust, confidence in the leaders who are striving to the best of their ability to produce effective and efficient results.

One thing, at least, is most apparent; there is no room for suspicion, doubt, fear, envy or jealousy in any program for development.

The success of the further development of the Sierra Region means increased prosperity for everyone, from the day laborer to the head of the banking institutions. Everyone will be benefitted. And everyone must fall in line and co-operate and boost for the development of the region. Every resort and camp owner and operator, every merchant and business man, every professional man and every other man, woman and child must do their bit to increase the development of the region.

President Roosevelt has called upon us with appealing frankness to rise above selfish interests and support wholeheartedly any measure which will foster and increase prosperity in a community or region.

We have a most unusual opportunity up here in the Sierra mountains. The possibilities are unlimited if we can but work close together.

DAILY TEXTBOOKS

Some one remarks that "daily newspapers recently are worth more than a book case of histories." It is true that epochal events are taking place in swift succession these days, and the newspapers which record and interpret them will not only be the best of source material for future historians, but are right now the most readable textbooks for men, women and children.

However, it is not in the matter of history alone that newspapers instruct readers. Ever since the depression began they have served as absorbing works on economics. They present not simply the viewpoint of a single authority, as a school textbook might do, but conflicting views, enabling a reader to become acquainted with different theories concerning specific problems. Every reader may thus pick the theory he approves, or even work out one of his own, conscious that time and the course of events will give the final test of worth.

In regard to social problems and social legislation, newspapers are educating the public swiftly and thoroughly. Unemployment, relief, hours of labor, wages, health, school problems and every related problem one can think of, are all presented and discussed in the newspapers, with practical examples to illustrate them.

Life these days seems to be a dizzier whirl than usual, but the regular and thoughtful reader of one or more good daily newspapers has a far better understanding of what is going on and what it's all about than he could have without their aid.

THRIFTY INDIANS

There is matter for meditation in Will Rogers' story about those Navajo Indians. Big-hearted as they are, they have undertaken to do their bit in saving money for the government in its time of need. So they hold a conference and decide that they can get along without the services of 25 white office holders who have been drawing public salaries for looking after them. To save the white man money, they will take care of themselves.

This is certainly good of them. The President should write them a nice letter, Congress should adopt a resolution of thanks, and the budget director should put a tablet in their honor on his office door.

It might not be a bad idea to bring some of those Navajo Indians to Washington to help look after the white man. There's only one objection to that. The simple red man, while he shows an unsuspected grasp of economics doesn't understand politics.

SOUTHERN INHOSPITALITY

KEY TO CONSUMPTION

Recent census statistics have shown a declining birth rate in this country. It is estimated that in 1980 we shall have a population of only 150,000,000 instead of the 200,000,000 we used to assume. Stabilization of population, some people argue, alters the whole industrial outlook. Manufacturing and agriculture, they say, will have to be slowed down to prevent ever-increasing surpluses.

Our Part in Government

TODAY men of all nations are evidencing deep interest in the affairs of their respective governments. This progressive attitude has undoubtedly resulted from the ceaseless, though not always recognized, influence of the wonderful Christian teaching that in the sight of God all men are equal. This does not mean that every person as a citizen can have assigned to him a special public duty. However, to everyone comes the privilege, as well as the duty, of being a supporter of right government, and this is indeed a high office. To each citizen come opportunities to support a righteous government through intelligent thinking. Through the cultivation and exercise of such qualities of thought as are implied by the words understanding, charity, citizenship, and prayer, the individual can prepare himself to be a useful citizen in his community.

Christian Science enables one to regard these subjects in their true light. As men begin to grasp the truth concerning God's government, and to prove their understanding by bettering individual thinking, they find themselves willing and ready to accept the responsibilities of useful citizenship.

Many opportunities are thus made available by spiritual understanding. This understanding includes intelligent comprehension, enlightenment, alertness. One who through Christian Science seeks to understand his government, its purposes, methods, and aims, has an intelligent standard whereby to measure its acts. He is not misled by false propaganda or by personal influence. He casts his ballot on the side of integrity, sound sense, and progress. In this way he rises above the limitations of a merely material sense of government and begins to demonstrate the truth concerning real government; for he has learned the spiritual nature of man as an intelligent son of an all-wise God, the perfect Mind.

Charity, too, is an open door to opportunities for serving. It may be described as a true sense of love. Charity is the attitude which rejoices in the certainty of the ultimate triumph of Truth, even when evil seems threatening. To charity, evil is only a deceiving false sense which may be progressively replaced with the true sense of being as spiritual. When charity governs thought, the citizen may look critically upon his government in a helpful way. He may turn the searchlight of critical inspection on the nation's functionings, and by keeping aglow in his own thought the light of wisdom, fairness, patience, and love he will be able to see not only the errors to be eradicated, but the good already accomplished.

Many doors to service are opened by the qualities expressed in the word "citizenship." Citizenship, as a way of living, has to do with such opportunities as come to the thinker in the usual walks of life, in the home, the school, or the shop. Citizenship means bringing to bear upon these activities the influence of a high idealism. It means practicing Jesus' Golden Rule, "All things whatsoever ye would that men should do to you, do ye even so to them." For the student of Christian Science to be a good citizen he must practice the truth discovered and founded by Mary Baker Eddy. That this religion is the Science of Jesus' teachings has been proved many times by the works which its students have done and are doing through the spiritual understanding of God's law. He who practices Christian Science, in ways small or great, is well prepared to take his place as a servant of mankind. Speaking of "a knowledge of the Science of being," Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 128), "It raises the thinker into his native air of insight and perspicacity." Surely, one so equipped can furnish strong support to the right activities of civic government. The doorway to the highest service is opened through the power for good in true prayer. Prayer founds thought on the divinely substantial Rock, Christ, the true idea of God, the strong foundation for the superstructure of harmonious living. True prayer avails, and the Christian Scientist learns to pray availingly not alone for the good of himself, but for the whole world. In Christian Science, prayer is fervent, reverent aspiration; it is spiritual vision. Prayer is that mental attitude which rests on the conviction that God, Love, is the only cause and creator, and that every real effect is Godlike. Prayer breaks the mesmerism of befogging material sense, and through the mists it reveals God's man, governed by God. Through prayer consciousness is filled with the holy facts of being; greed is replaced with unselfed love, hatred with brotherhood, lust with peace, and ignorance with wisdom.

"Are we benefited by praying?" asks Mrs. Eddy on page 2 of Science and Health; and her immediate answer is, "Yes, the desire which goes forth hungering after righteousness is blessed of our Father, and it does not return unto us void." As men universally learn so to pray, the mental atmosphere of the whole world will be suffused with loving-kindness, and all can then echo the angelic rejoicing, recorded by the Revelator, "The kingdoms of this world are become the kingdoms of our Lord, and of his Christ; and he shall reign for ever and ever."—*The Christian Science Monitor.*

THE ROAD TO TRUCKEE
"An Appreciation"
By Griffith Bonner

Thru Life we have traveled many highways and byways, some rough, some smooth. Of all the highways for rare scenic beauty and historic value, give me "The Road to Truckee."

Some smooth sailing on life's highway is what we all strive for, some of us find it, while some of us do not. On "The Road to Truckee" the way is smooth, the air clear and invigorating.

A merry and lively chipmunk, in fact many of them, cross the road in their hunt for food. Some of them in this act pay the chipmunk's supreme sacrifice when victims of an automobile wheel, as they search for additions to the family larder. The chipmunk to us typifies, alegorically speaking, the spirit of youth and action as it scampers on its way.

Winding around a curve one sees a herd of sheep grazing on the hill side, watched over by a faithful shepherd and two beautiful collies. We pause for a moment of respectful silence and while gazing at the sheep think of "The Good Shepherd For Us All," who is the Master of our Destinies, and that beautiful hymn "There were Ninety and Nine who safely lay, in the Shelter of the Fold, but one was off on the mountainside, away from the Gates of Gold."

The Road to Truckee—happy campers at Squaw Creek, Big Chief, and other points. Automobiles drawn up alongside the highway while tourists fish in the beautiful and winding waters of the Truckee River.

The hillside dotted with trees, cypress and pine and other kinds. We call them Christmas trees and think of the joy they bring at Yuletide. These trees are always with you on "The Road to Truckee."

The snowcapped mountains, like Switzerland, contrast in color with the blue sky—somehow one finds warmth of color in the mountain region.

Railroad tracks—the great Southern Pacific system has surplanted the stage coach and covered wagon as a means of transportation and yet we still visualize the old equipment.

Happy tourists in motor cars bound for mountain homes have replaced the pioneers.

On the Road to Truckee with some one you care for and who means the world to you all is in tune with the Infinite and when one arrives in that thriving community of Truckee one finds hospitality, friends, the spirit of comradeship and a welcome befitting the days of 49 in that historic spot.

It is a real joy and rare pleasure to travel on "The Road to Truckee" and share with someone the joys and beauties that can be derived from such a trip. The Truckee, Lake Tahoe and Sierra Region is indeed "God's Country."

MAIN STREET
By Stanley Bavier

THE PERFECT COMBINATION
By Rose Bennignton

Fear and hesitation,
Little seeds of doubt,
Makes a combination
You can live without.

Pluck, determination,
Will to do your best,
Makes a combination
Defying any test!

* * *

It is not necessary that we always have things the way we like them. Sometimes great good comes to our characters through doing things that we find positively objectionable to do and through putting up with conditions that we find find trying to endure.

When we say that something is "trying" to us, we are unconsciously, probably, uttering a very significant truth. For the thing is in reality trying us; it is testing us; it is putting us on the spot; it is showing up what we've got in us, what we are made of.

Nobody likes to be uncomfortable. Nobody likes to have things happen that are difficult to bear. Nobody likes to be deprived of things and of privileges. Few persons like to give up this and to give up that. Normally, we like ease and luxuries; we like to have our own way.

But characters do not develop under conditions that cater to the way we feel about ourselves. Our characters grow normally in a state that is more or less unsatisfactory to us.

You will find as a rule that the finest persons you meet are those who have been obliged to sacrifice for others or who have chosen to sacrifice for others.

A woman with a husband who humors her, babies her and seeks in every way to protect her from every stress and strain of life will generally speaking, not develop into as fine a character as the woman who is married to some real thing amajig who is a constant burden to her in one way or another and whose conduct calls for patience, courage and unselfishness.

One reason that marriage and children are recommended to round out life is that they call for self-sacrifice, industry for others, care of others, patience, fortitude. They develop the faculty and the facility of not centering thought on oneself, but outside of oneself. The very thing you do not like to do may be the thing you should do.

Yet, in dealing with the other person, we must not forget his character either. We must not forget that for his own good, pressure must be put on him if necessary, to induce him to step where he should and stand where he should. Parents, who fondly and blindly spoil their children, may be enriching their own characters, but they are harming the children's.

The greatest thing in this world is service to mankind, not only for the benefit of mankind but for the the benefit of those who serve. The putting up with all sorts of trying situations, the meeting of all sorts of disagreeable conditions and the handling of those things bravely, calmly, intelligently, is necessary if we are to give ourselves the soul development that we should receive in this phase of existence.

FASHION

The morns are meeker than they were,
The nuts are getting brown;
The berry's cheek is plumper,
The rose is out of town.

The maple wears a gayer scarf,
The field a scarlet gown.
Lest I should be old-fashioned,
I'll put a trinket on.

Plans for Truckee-Tahoe Airport

Plans for resumption of the old Truckee-Tahoe airport on the Brockway road were discussed at the Truckee Chamber of Commerce weekly meeting held last Monday noon.

Matt Green of the Tahoe Tavern, Arthur Dodworth, assistant manager for Mr. Green, Jack Matthews of Cal-Neva, Frank Comstock of Brockway Resort and Anthony Burke of San Francisco, a representative of the Varney Speed Lines, attended the meeting and were enthusiastic over the possibilities of increased business for the region by the establishment of a flying field where planes from San Francisco, Los Angeles and other southern cities might land and discharge passengers.

A party consisting of C. Edmunds James McIver, Stanley Bavier, Matt Green, Harry Comstock, Anthony Burke, Arthus Dodworth and Jack Matthews went to the Truckee-Tahoe flying field (1½ miles from Truckee on the Brockway Road) and went over the matter of getting the field in shape for the arrival of the first plane from San Francisco on next Saturday.

A watchman will be engaged to guard the field over the week end each week.

James McIver has been busy the last few days clearing the field of all clumps of sagebrush, and leveling off the humps.

Tasty Dishes For Today

By JUDITH WILSON

MENUS

Dinners

Grape and Orange Juice Cocktail
Halibut Fillets with Creole Sauce
Asparagus Fritters
Baked Potatoes
Wilted Lettuce or Cole Slaw
Huckleberries and Cream
Coffee

Salmon Salad-Cucumber Appetizers
Fish Souffle
Julienne Potatoes
Buttered Lima Beans
Lemon Snow Pudding with Custard Sauce
Iced Tea

FISH is such an inexpensive delicacy this summer that you should include it often in your luncheon and dinner menus. There are other advantages, too. It can be quickly prepared; it is good in all sorts of hot or cold dishes that are good for every course, and when the fresh fish is not available a canned variety may be substituted.

Halibut Fillets

To prepare the halibut fillets with Creole sauce in the first menu, get one and one-half pounds of halibut fillets, sprinkle with salt and arrange in a buttered baking dish. Melt two tablespoons of oil in a saucepan, add one small onion, minced, and one-half clove of garlic and simmer until tender. Then remove the garlic, add two cups of canned tomatoes, a bay leaf, one teaspoon salt and a speck of cayenne pepper. Bring to a boil and pour over the fish. Bake in a hot oven until the fish is tender and juicy (or about one-half hour), basting it often with the sauce. This will serve six.

Halibut Salad

If you wish, you might get an extra pound or two of the fish fillets, wrap them in a piece of cheesecloth and plunge into boiling, salted water. Cook gently until tender, then remove any bones and set in the icebox to be used for fish sandwiches or a salad for Saturday's luncheon or supper. Make a sauce, mixing a tablespoon each of minced parsley, chives, olives and cucumber pickles with half a cup of mayonnaise to which a teaspoon of lemon juice has been added. Mix this with the flaked, poached fish and spread on buttered bread with a crisp leaf of lettuce in each sandwich. The fleked fish may also be used as a well-chilled cocktail with a hot, spicy cocktail sauce.

Wilted Lettuce

The old-fashioned wilted lettuce is good with the fish dinner. Fry six slices of bacon in a heavy skillet until brown and crisp, then remove it from the fat. Brown a small sliced onion in the fat, add two heads of shredded lettuce and stir until the lettuce wilts. Add two tablespoons strong vinegar and the crisp bacon that has been broken into small bits.

Salmon Salad

Salmon salad in small round cucumber cups makes an attractive appetizer for any meal. Use two large cucmubers and split them crosswise in four pieces. Scoop out enough of the inside to leave deep little cups, then drop them into salted, ice water to crisp. Mix cold boiled salmon or canned salmon with an equal amount of diced celery and mayonnaise. Drain the cucumber mases and fill with the salad. Garnish each appetizer with riced egg yolks and paprika. Serve two of the cups on a crisp lettuce leaf to each person

Listen Folks!

The Sierra Sun is the only newspaper published which is read by nine out of every ten persons in Truckee-LakeTahoe-Sierra Region.

That's Why--

Advertising in the Sierra Sun has always proven so effective.

FOOTBALL

By Griffith Bonner

Football is just around the corner and both old and young followers of this great fall sport are already counting the days until the initial kick off.

Braven Dyer, Southern football authority, has already picked Southern California to win the Pacific Coast Conference another season We appreciate Mr. Dyer's viewpoint as he is a resident of the Southland, but for 1933 we choose to string along with the Northern schools and believe this year will find far more opposition from both the University of California at Berkeley and Leland Stanford than ever before with Washington and Oregon as usual in the running and the University of Califorina at Los Angeles ready at all times to throw a monkey wrench in the machinery.

Getting away from the Conference, schools that will have fine teams in the field will be St. Marys Santa Clara, San Francisco University, Loyola of Los Angeles and others.

Residents of this district will follow the University of Nevada at Reno's eleven with marked interest. The Nevada team from time to time shows much power and football knowledge and have made football history in the past. Playing St. Marys and San Francisco U and other schools the Reno boys have taken on a hard and interesting schedule. Western football full of thrills and open play is always a pleasure to see and residents of this section are fortunate in being so close to Reno where the Nevada boys always put up a good game.

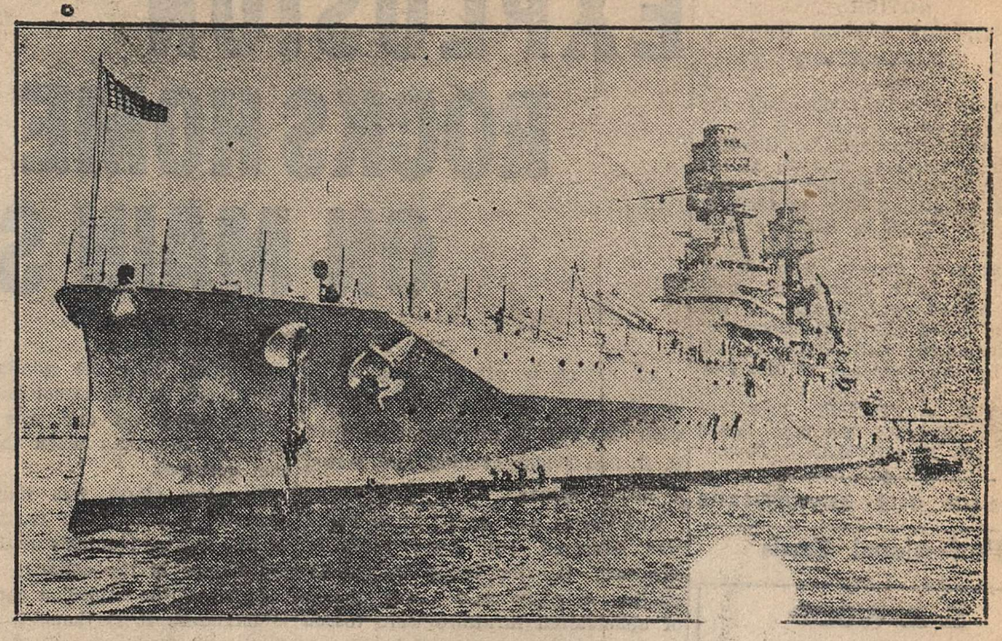

NOTE: "Grif," who furnishes the above, is a former New York university line man and coached at Purdue University in Indiana.

NEVADA CITY, Cal., August 3—(UP)—It isn't often a son has occasion to admonish his mother to tell the truth.

Mrs. Kate McCormack recently appeared in superior court here as a witness in a will case. Her son County Clerk R. N. McCormack administered the oath requiring her to "tell the truth, the whole truth and nothing but the truth."

No similar incident appear in the records of Nevada county.

What Trick Photography Can Do to a Battleship

The U. S. S. Pennsylvania, mighty dreadn aught of the Battle Fleet, responds to Secretary Swanson's bigger-navy program by stretching i n length and elevating her prow. But it's merely an illusion, produced by the use of a w ide angle lens in the camera that took this picture as the battleship lay at anchor in the har bor at Seattle, Wash.

DECIDES TO SHAVE AFTER 40 YEARS

MERCED, Cal., August 3—(UP)—James C. Williams, 57, a veteran "knight of the road" from Tulsa Oklahoma, looked in the mirror here the other day and saw a stranger—all on account of the heat.

For 40 years Williams had refused to shave and the result was a fine, thick beard almost a foot long.

The recent heat wave proved too much for the facial decoration and Williams finally submitted to a shave.

TAHOE AREA CAMPS OF CCC INSPECTED

GRASS VALLEY, Cal., August 2—Assistant Regional Forester R. L. Deering of San Francisco, with Forest Supervisor R. L. P. Bigelow of the Tahoe National Forest, last week made a tour of inspection of the CCC camps in the Tahoe National Forest.

The removal of fire hazards, inspection of roads built by the men, and individual inspection of the camps were included in the tour.

LUMBER 'CUT' DROPS 27.6 PER CENT IN 1932

SACRAMENTO, Cal., August 3—(UP)—A sharp reduction in the amount of lumber cut in California last year was revealed in a report of the U. S. Forest Service submitted to the state division of forestry.

The total "cut" for the year was 694,521,000 board feet, a reduction of 27.6 per cent as compared to 1931 and a drop of 54.2 below the 1930 reduction.

Ponderosa pine led all species in lumber production with 36,406,000 feet, or 55.7 per cent of the total Redwood was second with 135,647,000 board feet.

SLOT MACHINE TAX TO BE COUNCIL SUBJECT

ROSEVILLE, Cal.—The Roseville City Council met last evening in the city hall for its August business session.

A proposed ordinance was read and the councilmen will vote on it calling for the regulation of slot machines within the city and placing a license fee of $400 per year on groups of fifty machines with an additional cost of $10 apiece for each machine over this number.

A number of beer license applications, made since the last council meeting, when thirty were granted, were acted upon.

HARBOR DAY AT S. F. LURE FOR MOTORISTS

Harbor Day will be celebrated at San Francisco on Thursday, August 17, and many motorists throughout northern and central California are preparing to attend the event, according to the Touring Bureau of the California State Automobile Association. With parades on land and water, Harbor Day will be an outstanding feature of Fleet Week, during which more than forty warships of the Pacific Fleet will be anchored in the bay. On land the parade will include floats of industries allied with shipping, and military and naval marching units. On the bay hundreds of decorated craft will form a three mile marine parade. The Harbor Day program is under the direction of the San Francisco Junior Chamber of Commerce.

Henry Ford
Dearborn, Mich.

UNTIL WE LEARNED BETTER

Until we learned better, we used to mix wood and steel in our car bodies and wheels.

It was the best way to make bodies--then. But the state of the art has advanced.

Of course, it is more expensive to make an all-steel body than to make a wooden frame and nail steel panels on to it. The better way involves an initial expenditure of several millions of dollars for new dies, which renders a change very costly. Cars, especially large expensive cars which are produced in small volume, cannot afford this, because the dies cost as much for one car as for a million. That alone explains why all-steel bodies are not used in all cars.

But our basic policy from the beginning is to make a good car better, regardless of cost.

For example, when we discarded wood-steel body construction, it was not because we lacked wood. We still have some thousands of acres of the best hard wood in America. Economy would urge us to use up the wood first, and then adopt the better all-steel body. But we decided that quality was more important than expense.

We weighed the reasons, for and against, before we made the change.

We could see only one reason for retaining a mixed wood-and-steel body --nailing the metal on, instead of welding an all-steel body into a strong one-piece whole. That reason was, it would be cheaper--for us.

Our reasons for adopting an all-steel body were these: A wood-steel body is not much stronger structurally than its wooden frame. In all American climates, wood construction weakens with age. Every used car lot gives evidence of this. Rain seeps in between joints and the wood decays. A car may have a metal surface, and yet not be of steel construction. Under extreme shock or stress the steel body remains intact--dented perhaps, but not crushed.

Steel does not need wood for strength or protection. Wood is fine for furniture, but not for the high speed vehicles of 1933.

In the Ford body there are no joints to squeak, no seams to crack or leak.

The all-steel body is more expensive--to us, but not to you.

By all odds, then, steel bodies seem preferable.

Wheels also have become all-steel. No one argues that an electrically welded one-piece steel wheel, such as the Ford wheel, needs to be "strengthened" by adding wood to it.

The one-piece all-steel body is the strongest, safest, quietest, most durable body made. That is our only reason for making them.

August 7th, 1933

Henry Ford

EXPLOSION ROCKS HOME ON MAIN ST.

An explosion of unknown origin occurred in the home of Dick Joseph on East Main Street at 9:50 P. M. last Friday evening, and caused a heavy damage.

The entire east side of the house was damaged, and every piece of furniture in the living room, including a piano and heavy pieces of upholstered furniture were tossed about like mere match sticks, throwing them upside down. The drapes were torn from the windows and landed out on the street in front.

Fortunately no one was in the home at the time when the explosion occurred.

The fire alarm was immediately sounded, and the fire truck rushed to the spot and quickly extinguished the flames in the cellar.

Just how the explosion came about is unknown. It is thought, however that gas from an oil hot water heater was the cause.

BANK OF AMERICA LINES UP WITH N.R.A.

Bank of America, with a total personnel of 6,000, today completed plans for instituting the 40 hour week for all employees covered by the NRA reemployment plans provisions and is filing with the San Francisco Post Office a certificate of compliance with President Roosevelt's campaign to shorten working hours and spread employment.

Today's action climaxed a program instituted by the Bank on July 21 when A. P. Giannini, Chairman of the Board, wired President Roosevelt that the Bank of America was in complete accord with the reemployment plan announced on that day.

A general order has been dispatched from the Head Office of the bank in San Francisco, directing the heads of 410 branches throughout the state to place the 40 hour week in effect August 1. The hours during which the banks will be open are not altered by the order in accordance with the President's Reemployment Agreement.

WAS HIS FACE RED!

MARYSVILLE, Cal., August 3—(UP)—Just because he went for an automobile ride with a girl friend Private Laurence Brooks, Company F, National Guard, will spend the next 25 days at hard labor.

Returning from the encampment at San Luis Obispo, Brooks was ordered to remain with the company enroute. Instead he joined the girl and made the trip home by automobile.

A military court sentenced him for violation of orders.

Hot Weather Expensive As Well As Uncomfortable

SACRAMENTO, Cal., August 3—(UP)—The hot weather not only was uncomfortable, it was downright expensive, according to F. E Orchard, Los Angeles.

Unable to sleep because of the heat, Orchard decided to leave his room and go for a stroll, he told police.

Shortly after leaving his hotel he was pounced upon by two thugs, who relieved him of a watch valued at $60 and $45 in cash, he said.

During Russia's five-year plan the number of money savers in that country rose from 3.5 to 29 millions and the amount of deposits in banks from 213 to 999 million rubles.

Chamber of Commerce Will Sell Tickets for State Fair

The State Fair Board of Directors have this year made a special concession in connection with the admission to the Fair. No passes are to be issued this year.

The advance sale of the reduced price tickets are to be sold thru the Chamber of Commerce and anyone who desires to purchase these tickets should get in touch with Mrs. Lotta Bryant, Secretary of the local Chamber of Commerce before August 31.

There are two forms of tickets to be sold this year. The PATRONS TICKET entitles the bearer and lady to an unlimited number of admissions for the duration of the Fair, to the grounds, grand-stand, and horse show. The price of the ticket is $5.00. A SCRIP BOOK, containing ten 50c single admission tickets, sells for $2.50. Tickets may be torn from the book and distributed promiscuously, but must be purchased in lots of ten. These tickets are good for admission to the grounds, grand-stand and horse show. Both forms of tickets must be purchased prior to the opening day of the Fair. No reduced prices will be allowed after the opening day.

By purchasing this Scrip Book at the present time, the admission is 25c instead of 50c.

GEORGE CREEL TAKES JOB PUBLICITY POST

George Creel, writer and lecturer, was recently appointed director of publicity for President Roosevelt's reemployment campaign in California and Oregon, relieving Frederick J. Koster.

TRUCKEE IN FRONT RANK AS GATEWAY

With a total of 10,238 cars to its credit, Truckee led all gateway cities of California in the number of entering cars during the month of June. The report was made by the California state department of agriculture, following the compilation of data from records of quarantine stations maintained at the border on all main highways leading into the state.

Contrary to the usual order of traffic volume, the Truckee port showed greater incoming traffic than any other station, either in northern or southern California. For the total division, however, the southern California district slightly exceeded the Central division.

If the total number of cars checking through the Truckee station, 5,829 bore the license plates of states other than Nevada.

GRASS VALLEY GIRL SAVED FROM DEATH IN LAKE FAUCHERIE

GRASS VALLEY, Cal.—A story of the heroic rescue from drowning of Grace Jones, small daughter of Mr. and Mrs. Alvon Jones of this city reached here last Saturday when the family returned from a trip to Lake Faucherie.

The girl slipped from a rock on the edge of the lake and remained under water several minutes before her absence was noticed.

Ben Lake, caretaker of the lodge of the Grass Valley Sportsmens Club at the lake, who was nearby in a boat and who does not swim, leaped from the boat, and by holding on to the side located the girl in eight feet of water with his feet and brought her to the surface.

Several men who were with the party at the lake administered artificial respiration to the girl and revived her.

Last Rites Held Monday For Grass Valley Hero

GRASS VALLEY, Cal.—Funeral services for George S. Clemo, 38, a native of Gold Flat, Nevada County, a World War veteran who died in the veterans hospital in Livermore, was held Monday in the Holmes-Hooper Funeral Home in Grass Valley.

Clemo's death was attributed to causes brought about by his service in the war. The Hague-Thomas-Hegarty Post No. 130, American Legion, of which he was a member had charge of a military burial service.

Surviving are his widow, Mrs. Vera Clemo, and a son, Robert Clemo, both of Grass Valley.

More horsepower is available on farms in the United States than in manufacturing and mining combined.

Youthful Grass Valley Hit-Runner Sent To Ione

NEVADA CITY, Cal. — William Leary, 20, Grass Valley youth who was charged with driving an automobile while intoxicated and with hit-run driving, and who recently was remanded to the custody of his mother by the superior court pending a decision of the juvenile authorities, is now in the Preston School of Industry at Ione, Amador County. The length of his term will be determined by his behavior and the credits earned at the institution.

JOIN THE N. R. A. AND DO YOUR PART

FRIENDS MEET IN JAIL AFTER A WILD NIGHT

SACRAMENTO, Cal., August 3—(UP)—When Walter Doyle awoke in a city jail cell and discovered his good friend, Iscar Nelson occupying the adjoining bunk, he was greatly surprised.

"Well, well, what are you in for?," he inquired. "Blessed if I know though I have a recollection of some drunk running into my car," answered Nelson, "why are you here?"

"I kinda remember a somewhat similar happening," said Doyle.

Then it dawned on them that it was their own cars which had been in collision. Both were charged with intoxication.

Nevada County To Get $10,712 Motor Vehicle Fund

By MELVIN LORD
(United Press Staff Correspondent)
Special to the Sierra Sun

SACRAMENTO, Cal., August 2—(UP)—Apportionment of the second quarter motor vehicle fuel fund totaling $8,619,082 has been announced by Ray L. Riley, state controller, to give new impetus to road work in California.

Of the total amount in the fund, $2,873,027 will be distributed to the counties, including $10,712 to Nevada county, the anouncement stated.

The remainder of the quarter's fund, a total of $5,746,054, will go into the state fund for the construction and maintenance of state highways.

State records show that the apportionment for the same period in 1932 amounted to $8,932,396, indicating a decrease of $304,314 for the second quarter of this year as compared to 1932.

Despite the recent decrease in the revenues from the 3 cent gasoline tax, county road funds will be in better shape than ever before, in the opinion of state officials.

As a result of the adoption of the bill whereby the state takes over almost 7,000 additonal miles into the secondary highway system, a substantial portion of road costs will be lifted from the counties.

At the same time gas tax allowances will be made to cities for main thoroughfares.

Another change in the law provides that in addition to the minimum of $20,000 a year allowed each county, the remainder is allocated to all counties on the basis of motor vehicle registration. In this way the small counties receive more than even before inasmuch as many of them were only allowed the minimum amount in the past.

Allocations for the quarter ranged from $1,059,192 for Los Angeles county, to $5,139 for Alpine county.

A new device was recently demonstrated to those interested in aviation by which the sound of the propellor is transmitted through microphones to the airport, where it causes a light to flash on a ground map, showing the exact location of the plane at all times.

Christian Science

"Spirit" will be the subject of the Lesson-Sermon Sunday, August 6, in all Churches of Christ, Scientist, branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

The Golden Text will be: "Teach me to do thy will; for thou art my God; thy spirit is good" (Ps. 143:10). Other Bible citations will include: "This I say then, Walk in the Spirit, and ye shall not fulfil the lust of the flesh" (Gal. 5:16).

The Lesson-Sermon also will include the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "When once destroyed by divine Science, the false evidence before the corporeal senses disappears. Hence the opposition of sensuous man to the Science of Soul and the significance of the Scripture, 'The carnal mind is enmity against God.' The central fact of the Bible is the superiority of spiritual over physical power." (p. 131).

This Rat Was Curious; Is Killed By Explosion

LINCOLN, Cal., August 3—(UP)—Curiosity, in this instance, killed a rat.

The rodent's inquisitiveness led it to investigate an oil switch, at the local plant of the Pacific Gas and Electric Company, carrying 11,000 volts. Contact with a high voltage wire while standing on the iron switch frame caused a short-circuit.

Smashed by the explosion which followed, the switch was strewn over a wide area. So was the rat.

BULL SNAKE NECKTIE NOT SO COMFORTABLE

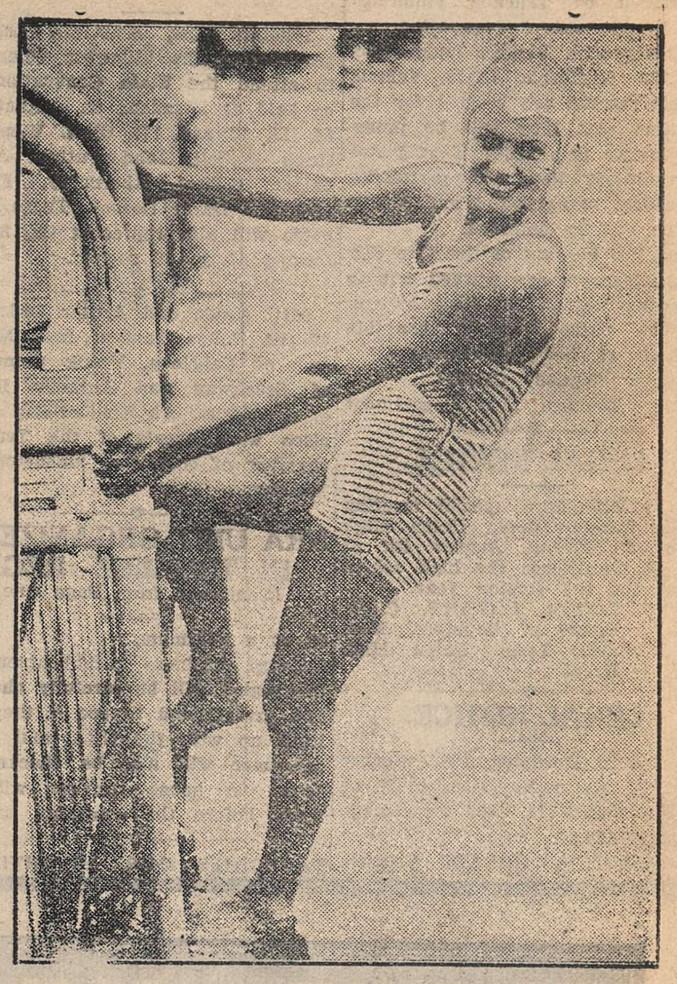

ALTURAS, Cal., August 3—(UP)—Wearing a full grown bull snake necktie, wouldn't appeal much to Ray L. Ward, Modoc county rancher.

While operating a rake on his ranch recently one of the prongs went through the body of a snake. As he dumped the load of hay the snake was swirled through the air and wrapped about Ward's neck.

Ward lost no time in removing the wriggling necktie.

New York City has approximately 400,000 negroes.

NOTICE

The employers of all crafts, laborers and truck drivers, are respectfully invited to attend a meeting for organization of an employees body to act in conjunction with the contractors' organization of this district, to work under the new code now in formation.

Meeting to be held at the Women's Club, Tahoe City, Friday, August 4 at 8 P. M.

A. C. DELBO, Sec. Pro Tem.

'42nd STREET' COMES HERE SAT. AND SUN.

Learn the intimate secrets of the private lives of glamorous people of the theatre. See the slave driving director who risks his life to make the show a hit . . . the girl who passes up the "big break" she has waited 10 years for, in order to save the show . . . the little country girl who dances her way thru perils and pitfalls to stardom.

The merchants of Truckee have agreed, starting August 2nd, to close their establishments at 7 P. M.

After years of experimenting, the Sangerhausen Rosarium in Germany now claims to have perfected a perfect black rose.

NEW SALES TAX NOW IN EFFECT

Cross word puzzles lost their popularity in this region last Tuesday when the new sales tax of 2½ per cent went into effect.

Up and down Commercial Row the main topic of the day was—"Say, how do you figure this blankety-blank-blank new sales tax"

Everyone agreed that the pencil manufacturers certainly had gotten a "break' 'as from now on, there will be plenty of use for lead pencils.

The common opinion seems to be that the merchants are in for a "sticking" as the sales tax will be computed on the gross sales, whereas, the merchant will be unable to get the tax from any patron who makes a purchase of less than 14 cents.

Here is the way the tax will be passed on as agreed between merchants and the state board of equalization:

No tax to consumer on sales from 1 to 14 cents.

One cent on sales from 15 to 59 cents.

Two cents tax on sales from 60 cents to $1.05.

Three cents tax on sales from $1.06 to $1.49.
